About me

- In the year 2010 I started studying civil engineering on Gdańsk University of Technology.

- During the summer break of 2012 and 2013 I worked as a site engineer assistant.

- In the 2014 I worked in Czech Republic for architectural firm.

- In the fall of 2015 I graduated with master's diploma in civil engineering.

- At the beginning of 2016 I worked shortly for industrial design-and-build company.

- I left that job with intention to transition from construction industry.

- Over the next few months I explored some of my interests and eventually focused on web-development.

Skills and projects

- I have experience using HTML, CSS, SASS, JS, AJAX, PHP i SQL.

- My projects in order of creation (GitHub: https://github.com/bart5).

  1. http://testserver.pl/orphans
  2. http://testserver.pl/unity
  3. http://testserver.pl/exploder
  4. http://testserver.pl

- My command of English in pretty good, but varies depending on how often I use it.

Expectations

- I anticipate further learning of all that will be needed.

- I expect to start from an entry level in terms of both tasks and a salary.
